Technology
Association**

NOTICE

Consumer Technology Association (CTA)TM Standards, Bulletins and other technical publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards, Bulletins and other technical publications shall not in any respect preclude any member or nonmember of the Consumer Technology Association from manufacturing or selling products not conforming to such Standards, Bulletins or other technical publications, nor shall the existence of such Standards, Bulletins and other technical publications preclude their voluntary use by those other than Consumer Technology Association members, whether the standard is to be used either domestically or internationally.

Standards, Bulletins and other technical publications are adopted by the Consumer Technology Association in accordance with the American National Standards Institute (ANSI) patent policy. By such action, the Consumer Technology Association does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard, Bulletin or other technical publication.

This document does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this document to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

This document is copyrighted by the Consumer Technology Association (CTA)TM and may not be reproduced, in whole or part, without written permission. Federal copyright law prohibits unauthorized reproduction of this document by any means. Organizations may obtain permission to reproduce a limited number of copies by entering into a license agreement. Requests to reproduce text, data, charts, figures or other material should be made to the Consumer Technology Association (CTA)TM.

FOREWORD

This standard was developed under the auspices of the Consumer Electronics Association (CEA) R4 Video Systems Committee. It supersedes CEA-2013-A, *Digital STB Background Power Consumption*, and CEA-2022, *Digital STB Active Power Consumption Measurement*.

Set-top Box (STB) Power Measurement

1 Scope

This standard defines procedures for measuring Set-top Box power consumption. CEA-2043: *Set-top Box (STB) Power Measurement* standard supersedes CEA-2013-A: *Digital STB Background Power Consumption* and CEA-2022: *Digital STB Active Power Consumption Measurement* standards. CEA-2043 includes procedures for measuring power consumption for a broad variety of STB types and features, and therefore not all test procedures are applicable to all STBs. The entity specifying the use of CEA-2043 for STB power measurement is expected to select which procedures are required for the STB being tested and is expected to define predetermined testing parameters required by the test procedures chosen.

Several informative annexes are included:

- Annex A maps CEA-2043 measurement parameters to the US EPA ENERGY STAR® Program Requirements for Set-top Boxes,
- Annex B maps CEA-2043 measurement parameters to IEC 62087:2011 *Method of Measurement for the Power Consumption of Audio, Video, and Related Equipment*,
- Annex C provides a method for measuring Satellite STB power consumption when the satellite STB under test is also providing power to the satellite reception equipment (e.g. LNBs), and
- Annex D provides an example of a concurrent testing scenario and a recommended tests and testing parameters for common STB types.
- Annex E provides a Tester Information Template to assist in specifying the use of CEA-2043
