NOTICE

Consumer Technology Association (CTA)TM Standards, Bulletins and other technical publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards, Bulletins and other technical publications shall not in any respect preclude any member or nonmember of the Consumer Technology Association from manufacturing or selling products not conforming to such Standards, Bulletins or other technical publications, nor shall the existence of such Standards, Bulletins and other technical publications preclude their voluntary use by those other than Consumer Technology Association members, whether the standard is to be used either domestically or internationally.

Standards, Bulletins and other technical publications are adopted by the Consumer Technology Association in accordance with the American National Standards Institute (ANSI) patent policy. By such action, the Consumer Technology Association does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard, Bulletin or other technical publication.

This document does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this document to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

This document is copyrighted by the Consumer Technology Association and may not be reproduced, in whole or part, without written permission. Federal copyright law prohibits unauthorized reproduction of this document by any means. Organizations may obtain permission to reproduce a limited number of copies by entering into a license agreement. Requests to reproduce text, data, charts, figures or other material should be made to the Consumer Technology Association.

1.0	INTRODUCTION.....	1
2.0	DEFINITION OF TERMS - GENERAL.....	1
2.1	Reference Frequency.....	1
2.2	Reference Recording Level.....	1
2.3	Rated Load Impedance.....	1
2.4	Rated Output Level.....	1
3.0	STANDARD TEST CONDITIONS.....	1
3.1	Power Supply Requirements.....	1
3.2	Environmental Conditions.....	2
3.3	Test Signals.....	2
3.4	Standard Load Impedance.....	2
3.5	Standard Control Settings.....	2
3.6	Test Equipment.....	3
4.0	TEST AND RATINGS.....	5
4.1	Frequency Response.....	5
4.2	Idle-Channel Signal-to-Noise Ratio (S/N).....	7
4.3	Dynamic Range.....	8
4.4	Total Harmonic Distortion + Noise (THD+N).....	10
4.5	Channel Separation.....	13
4.6	De-emphasis Error Measurement.....	15
4.7	Wow and Flutter.....	16
4.8	Intermodulation Distortion.....	18
4.9	Phase Difference between Channels.....	19
4.10	Level Difference between Channels.....	21
4.11	Output Voltage.....	22
4.12	Pitch Error.....	23
4.13	Access Time.....	24
4.14	Level Linearity.....	27
4.15	Linearity with Dither.....	29
4.16	Square Wave Test.....	31
4.17	Impulse Test.....	31
5.0	RATING.....	32

STANDARD METHOD OF MEASUREMENT FOR COMPACT DISC PLAYERS

1.0 INTRODUCTION

This Standard is a result of the efforts of the Compact Disc Subcommittee of the EIA Audio Systems committee. This Standard shall apply to domestic reproducing equipment for Compact Discs (CDs) and defines the methods of measurement and the form of disclosure of performance characteristics of consumer CD players.

2.0 DEFINITION OF TERMS -GENERAL

Note: Within the scope of this standard, the following definitions shall apply. Specific definitions will be found in Sections 4.1 to 4.16

2.1 Reference Frequency

A frequency corresponding to test frequencies found on the Standard Test Disc described in Appendix A.

2.2 Reference Recording Level

The level that corresponds to the reference recorded levels on the Standard Test Disc.

2.3 Rated Load Impedance

The load impedance corresponding to the load intended for connection to the output terminals of the CD player under test.

2.4 Rated Output Level

The level corresponding to the standard output level applied to the load.

3.0 STANDARD TEST CONDITIONS

3.1 Power Supply Requirements

3.1.1 The supply voltage shall be within $\pm 1\%$ of the rated supply voltage. Direct-current-powered CD players shall be tested at the recommended supply voltage $\pm 1\%$, and this voltage shall be stated.
